NEUE MONTREAL 36 · LINE HEIGHT 1.2

Interactive projection mapping on Uppsala Town Hall, where the public could paint the facade in colour.

TEXT
NEUE MONTREAL 16 · LINE HEIGHT 1.5

Four weatherproofed touch pads with embedded lighting were placed in the main square, built to handle snow, rain, and countless jumps. Each pad triggered a colour ripple across the facade, animating an ocean scene on the building's surface. When all four pads were activated at once, a final sequence of light and music played out.

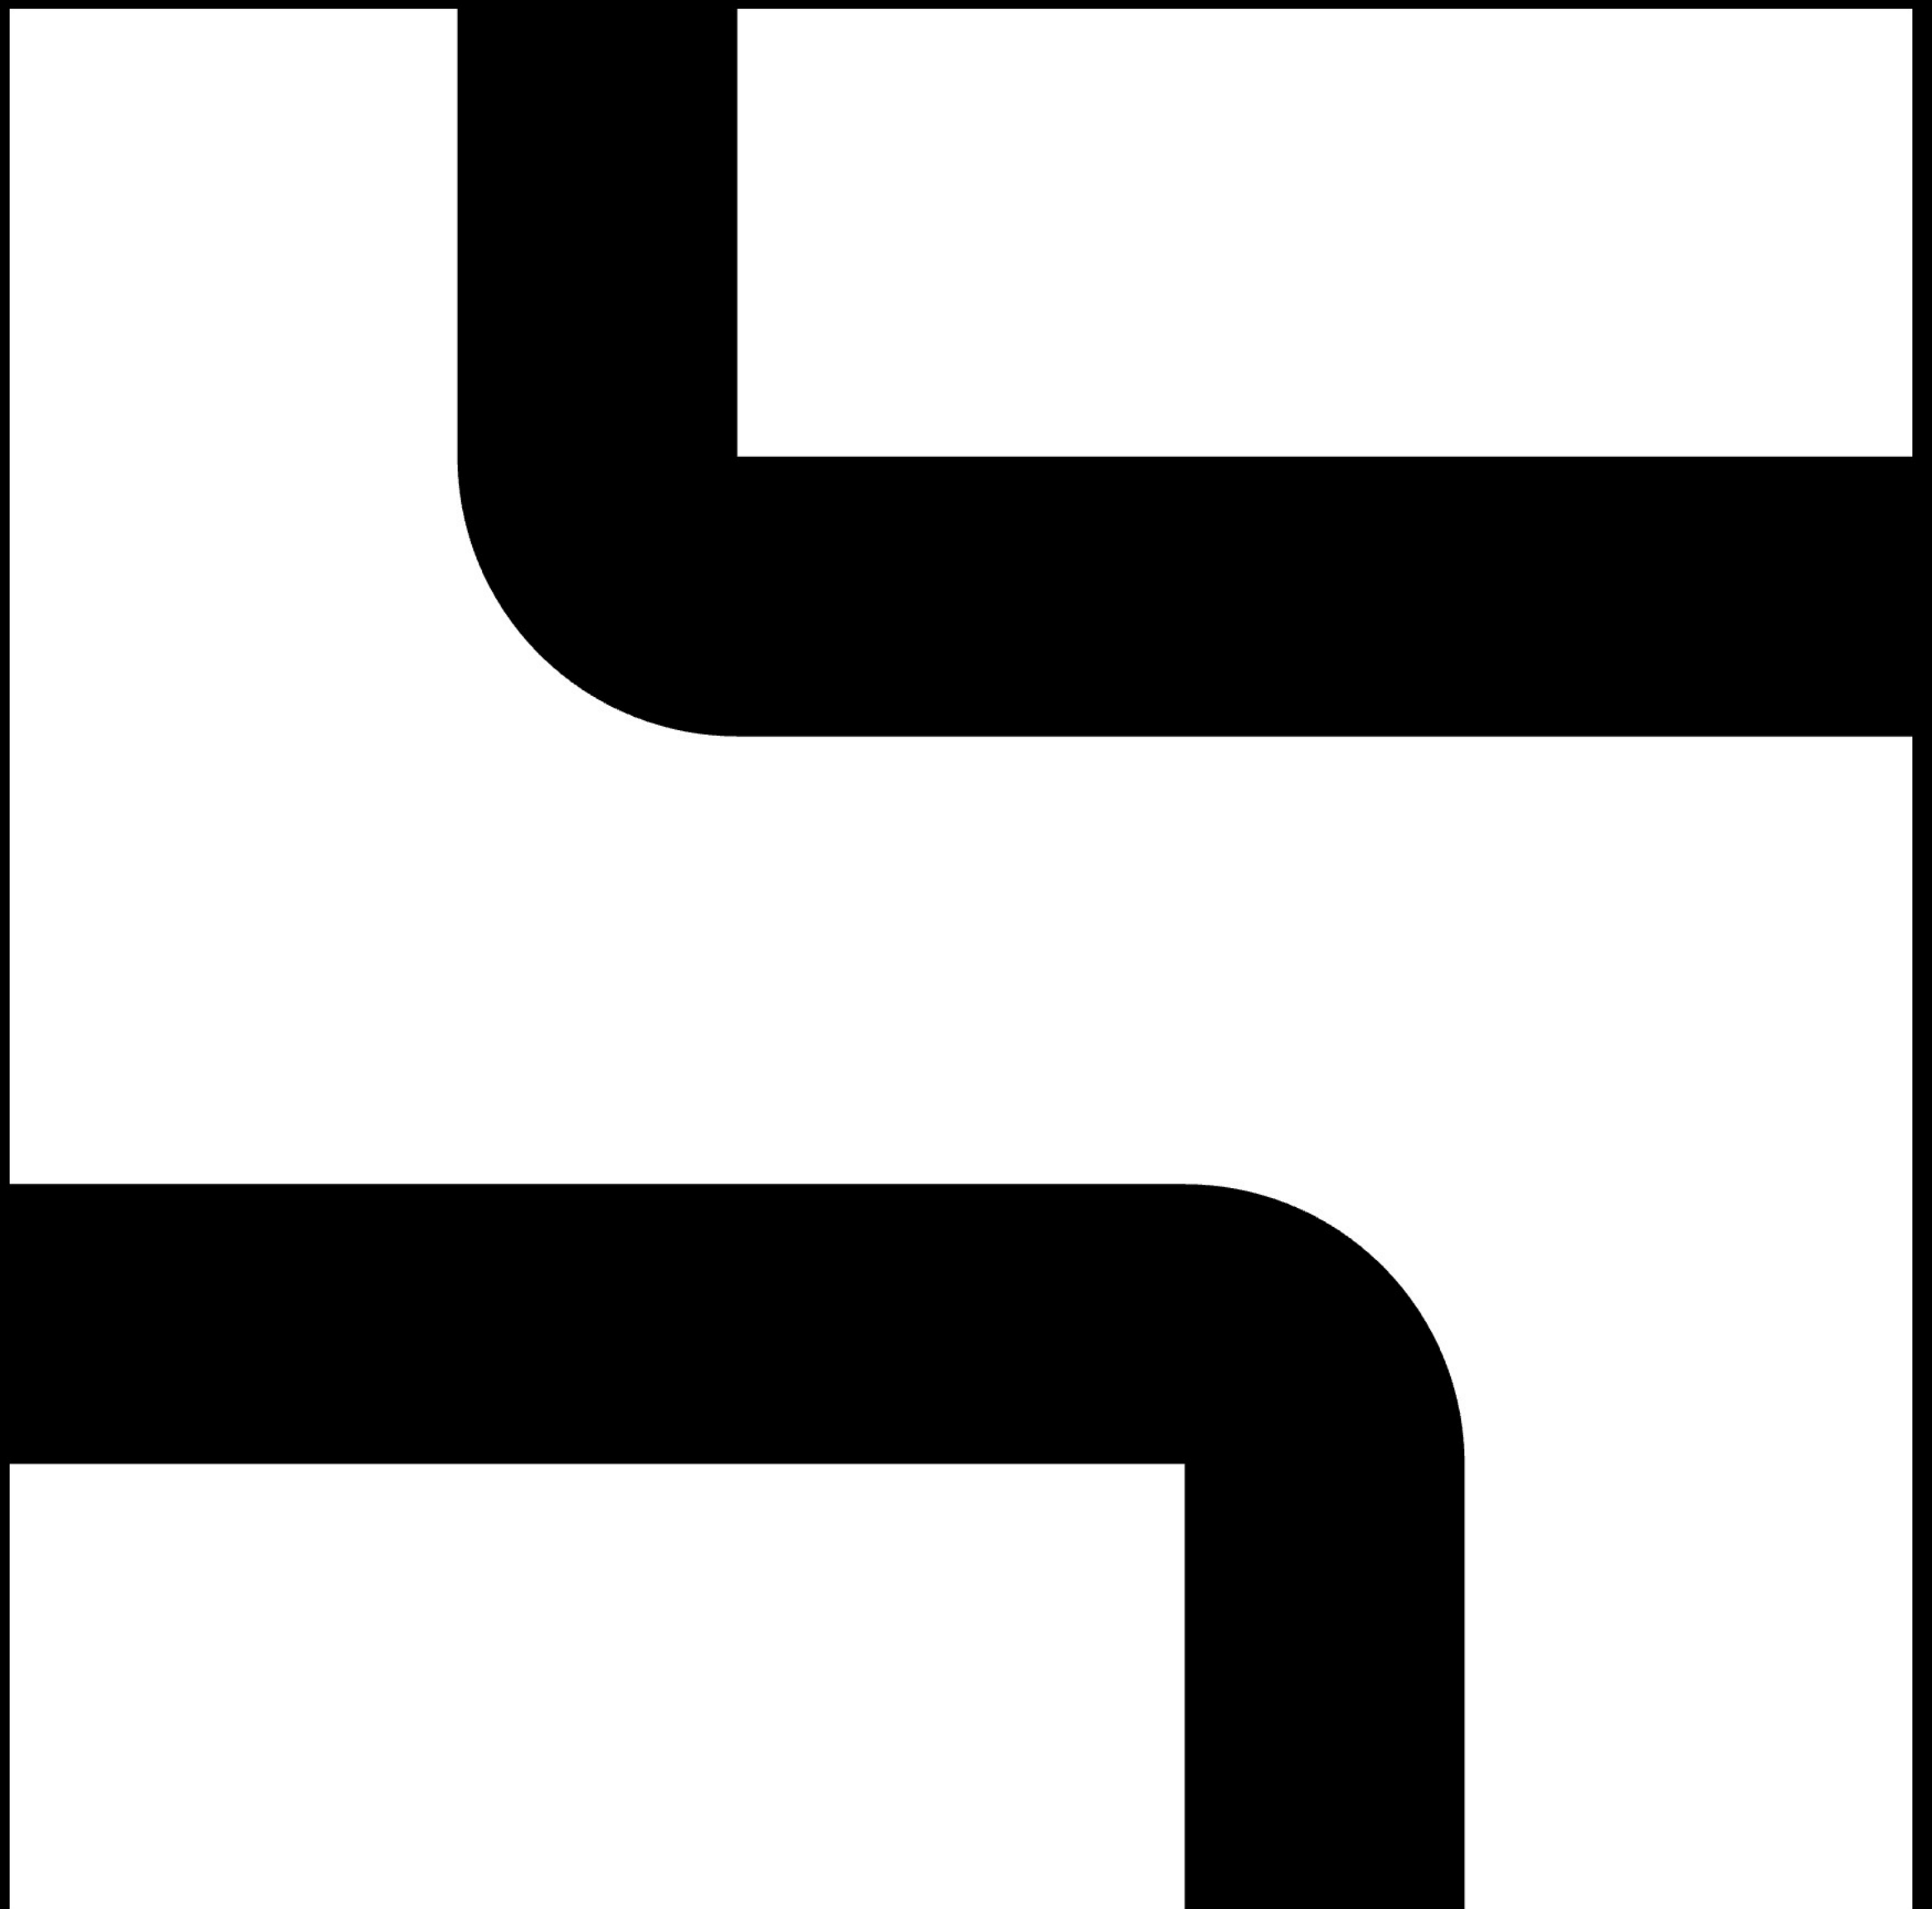

SALA HJÄRTSLAG

Projection mapping 400 years of
Sala's history onto a curved facade.

JAGHAD

For three nights, a building in central Stockholm became a five-storey, playable arcade game.

VI KOMMER
I FRED

In Kungsträdgården, facing the Royal Castle, a screen pulled everyone who walked past into an alien invasion of Stockholm.

THE LAUNCH

For the launch of TV4's sci-fi drama "Vi kommer i fred", a single-camera totem stood in Kungsträdgården, facing the Royal Castle across the water, and dropped whoever walked by straight into the show's opening scene, a huge alien craft breaking through the clouds over the city.

HOW IT WORKS

Behind it, the whole invasion ran live in Resolume, mapped onto the live camera feed so anyone who stepped up landed inside the shot. Two versions of the scene, one for day and one for night, swapped on a timer to match the light, and it ran around the clock for two weeks.
